

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A rubber composition characterized by compounding a rubber component ~~comprised~~ consisting of at least one of natural rubber and/or synthetic diene rubbers polyisoprene rubber with a phenolic resin represented by the following formula (I):

(wherein R<sup>0</sup> is a hydrogen atom, an alkyl group, a phenyl group or a methylol group, and each of R<sup>1</sup> and R<sup>2</sup> is an arylene group, an alkylene group having a carbon number of 2-10, an aralkylene group, a cycloalkenylene group or a cycloalkadienylene group, and n is 0-10).

2. (original): A rubber composition according to claim 1, wherein each of R<sup>1</sup> and R<sup>2</sup> in the formula (I) is a xylylene group.

3. (original): A rubber composition according to claim 1, wherein each of R<sup>1</sup> and R<sup>2</sup> in the formula (I) is [1,1'-biphenyl]-4,4'-dimethylene group.

4. (previously presented): A rubber composition according to claim 1, wherein  $R^0$  in the formula (I) is a hydrogen atom.

5. (previously presented): A rubber composition according to claim 1, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.

6. (original): A rubber composition according to claim 5, wherein the compounding amount of the phenolic resin of the formula (I) is 1-10 parts by mass per 100 parts by mass of the rubber component.

7. (original): A rubber composition according to claim 1, wherein a hardening agent as a methylene donor is contained in the rubber composition at an amount corresponding to 1-30% by mass of the phenolic resin of the formula (I).

8. (original): A rubber composition according to claim 7, wherein the hardening agent is hexamethylene tetramine.

9. (previously presented): A rubber composition according to claim 2, wherein  $R^0$  in the formula (I) is a hydrogen atom.

10. (previously presented): A rubber composition according to claim 3, wherein  $R^0$  in the formula (I) is a hydrogen atom.

11. (previously presented): A rubber composition according to claim 2, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.

12. (previously presented): A rubber composition according to claim 3, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.

13. (previously presented): A rubber composition according to claim 4, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.

14. (previously presented): A rubber composition according to claim 9, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.

15. (previously presented): A rubber composition according to claim 10, wherein the compounding amount of the phenolic resin of the formula (I) is 1-30 parts by mass per 100 parts by mass of the rubber component.
